What this guide gives you

- A simple workflow for keeping your real jewelry recognizable.
- Copy-ready prompts for studio, lifestyle, close-up and fashion content.
- A fix for one of the biggest AI problems: wrong size and proportions.
- A fast way to turn ordinary product photos into polished social content.

Important

AI can still make mistakes. Check every stone, clasp, engraving, texture and proportion before using an image to sell a specific product.

Keep your real jewelry intact

WRONG SCALE

CORRECT SCALE

5 rules for accurate product images

1. Upload a clean product photo.
2. If possible, upload the same piece on a person too.
3. Give the real size in cm.
4. Say clearly: do not redesign, resize or change proportions.
5. Treat your uploaded product as the source of truth.

The 2-reference method

PRODUCT

REAL SCALE

Why this works

Without scale information, AI has to guess. A real on-body reference gives the model much better context for how large the item should look.

[OPEN THE MASTER PROMPT](#)

Exact-product master prompt

PROMPT - SELECT & COPY

Use the two uploaded images as references. The clean product photo is the source of truth for the jewelry design. The on-body photo is the source of truth for scale and placement.

Place the exact jewelry on a realistic fashion model. Do not redesign the item. Keep the exact shape, texture, proportions, color, surface details and construction. Do not enlarge or shrink it. Real size: [HEIGHT] cm x [WIDTH] cm.

Create a polished editorial image with natural skin texture, realistic metal reflections, soft directional light and a clean background. The jewelry must remain the main focus.

Replace [HEIGHT] and [WIDTH] with your measurements before you use the prompt.

Stacks need a group reference

YOUR JEWELRY

POSE / MOOD

For bracelet stacks, photograph the pieces together when you can. If the reference shows 8 bracelets and you upload 8 separate product images, AI may invent the way they stack. A grouped photo gives clearer spacing and order.

Bracelet stack

OPEN THE BRACELET PROMPT

Bracelet-stack prompt

PROMPT - SELECT & COPY

Create a modern fashion editorial image using my uploaded bracelet stack. Keep every bracelet exactly as shown in my product reference. Do not change the number of pieces, stone colors, chain types, shapes, thicknesses or order.

Show the stack on the wrist of a stylish model wearing casual blue denim and a simple white top. Keep the hand relaxed and natural. Use soft daylight, realistic skin texture and clear metal reflections. Make the image feel effortless, premium and suitable for a jewelry brand campaign.

Vertical composition. Focus on the wrist and jewelry. Keep all bracelet proportions realistic.

Luxury Studio Gold

AI-GENERATED EXAMPLE

[OPEN THIS PROMPT](#)

Luxury Studio Gold

PROMPT - SELECT & COPY

Use my uploaded jewelry photos as the source of truth. Create a high-fashion studio portrait of an elegant female model wearing the exact pieces. Keep the jewelry unchanged in design, size, color and proportions.

Style the model in a soft ivory outfit with clean shoulders and minimal makeup. Use warm neutral studio tones, smooth background, soft directional light and crisp highlights on the metal. Show layered necklaces, statement hoop earrings, rings and bracelets clearly without overcrowding the frame.

The image should feel like a premium magazine jewelry campaign: realistic skin, refined pose, glossy but natural metal reflections, sharp jewelry details, shallow depth of field. Vertical portrait, jewelry-first composition.

Sunlit Resort Lifestyle

PROMPT - SELECT & COPY

Use my uploaded jewelry photos and keep the exact product designs unchanged. Create a sunlit lifestyle portrait of a stylish woman at a Mediterranean-style resort near the sea.

She wears a textured cream summer dress, natural makeup and loose hair moving slightly in the breeze. Place the exact earrings, necklaces and rings from my references on her at realistic scale.

Use bright blue sky, warm natural sunlight, soft shadows and a clean luxury-travel mood. Make the jewelry catch the light without looking over-edited. Natural skin texture, realistic reflections, editorial quality. Vertical portrait, relaxed pose, premium but effortless social-media aesthetic.

Bold Color Editorial

PROMPT - SELECT & COPY

Create a bold fashion editorial portrait using the exact jewelry from my uploaded references. Do not redesign, simplify or replace any piece. Keep correct size and proportions.

Dress the model in a rich fuchsia or hot-pink outfit on a clean light background. Let the strong color frame the gold-tone jewelry without covering it. Use polished studio lighting, clear highlights, natural skin texture and a confident direct pose.

Show the statement earrings, layered necklaces, rings and wide bracelet clearly. Keep the jewelry visually dominant. The final image should feel modern, premium, playful and suitable for a fashion magazine campaign. Vertical crop, sharp jewelry details, realistic materials.

Poolside Soft Luxury

PROMPT - SELECT & COPY

Use my uploaded jewelry photos as the exact product reference. Create a chic poolside portrait of a blonde woman in a simple neutral swimsuit or summer top. Keep the jewelry design, stones, color, size and proportions unchanged.

Place the model beside turquoise water in soft warm sunlight. Use subtle water reflections, natural skin texture and a relaxed pose with one hand near the face. Make the jewelry look wearable for everyday summer life, not like costume props.

Focus on earrings, necklace, rings and bracelets. The mood is clean, fresh and aspirational. Photorealistic fashion photography, shallow depth of field, vertical portrait, premium social-media campaign.

Glossy Beauty Close-Up

PROMPT - SELECT & COPY

Create a glossy beauty close-up using my uploaded jewelry as the source of truth. Keep every piece unchanged in design, texture, size, color and proportions.

Frame the model from shoulders up. Use large statement hoops, layered gold-tone chains, several rings and stacked bracelets. Keep the outfit simple and neutral so the jewelry is the star.

Use warm studio light, soft shadows, detailed skin texture and strong but realistic metallic reflections. The camera should feel close, like a luxury beauty campaign. Avoid exaggerated jewelry size. Keep the hands elegant and anatomically natural. Vertical portrait, crisp product detail, premium editorial finish.

Clean Neutral Campaign

PROMPT - SELECT & COPY

Use my uploaded jewelry references exactly as they are. Create a clean neutral fashion portrait on a soft beige or light gray studio background. Do not redesign any jewelry. Keep exact shape, size, texture and proportions.

Style the model in a soft off-white wrap top with minimal makeup and natural hair. Show chunky gold-tone earrings, layered necklaces, bracelets and rings with enough space around every piece.

Use soft diffused light, gentle shadows and realistic reflections. The image should look expensive but minimal, easy to use for a product launch, website banner or Instagram carousel. Vertical composition, jewelry-first framing, photorealistic finish.

Black Blazer Macro

AI-GENERATED EXAMPLE

[OPEN THIS PROMPT](#)

Black Blazer Macro

PROMPT - SELECT & COPY

Create a tight fashion close-up using my uploaded jewelry photos as exact references. Keep every piece unchanged in design and scale.

The model wears a black blazer. Crop from lips to upper chest so the frame focuses on a gold-tone chain necklace, statement earrings and stacked rings. One hand lightly touches the necklace.

Use warm directional light with deep but soft shadows. Make the gold reflections rich and realistic against the black fabric. Keep skin texture natural and hands anatomically correct. The mood is sophisticated, modern and editorial. Vertical composition, macro detail, sharp jewelry focus, premium magazine aesthetic.

One line that is worth repeating

Do not redesign the jewelry. Keep the exact shape, texture, color, construction and real-world proportions from my uploaded product reference.

Before you publish

Final checklist

- ☐ Is the jewelry still the same product?
- ☐ Is the size believable on the body?
- ☐ Are stones, engravings and textures correct?
- ☐ Are hands, ears, clasps and chains anatomically believable?
- ☐ Does the jewelry remain the main focus?
- ☐ Does the image match your brand mood?

Tip: AI content works best when it supports real product photography, not when it replaces product accuracy.
